Michael Milken, Ivan Boesky, Martin Siegel, and Dennis Levine will long be remembered for the Wall Street insider trading scandals of the 1980s. Stewart, a Pulitzer Prize-winning Wall Street Journal reporter who covered the various scandals, has used his reportage as well as an exhaustive culling of court documents, testimony, and interviews with all of the participants to fashion an authoritative account of what happened. Stewart has done a thorough job in assembling the facts and has made connections that may surprise some readers. For example, Milken, the Drexel Burnham Lambert junk bond king who convinced many savings institutions and insurance companies to buy these bonds in large quantities, may have indirectly contributed not only to the bailout of various thrifts but also to the insolvency of some insurance companies. While this is a well-researched and highly readable work, there is such an abundance of financial details that a glossary of terms and related Wall Street jargon would have been helpful. This minor caveat aside, Stewart's contemporary morality tale is recommended for all business collections in public, special, and academic libraries. (Index not seen.) From Kirkus Reviews

A damningly detailed rundown on the predatory conspirators whose willful violations of securities law and ethical standards gave Wall Street a deservedly bad name during the takeover frenzy of the 1980's. Wall Street Journal editor Stewart (*The Partners, The Prosecutors*) was a beat reporter for much of the dirty decade. As one result, he has firsthand knowledge of the carriage-trade criminals who made a mockery of free enterprise during one of the century's greatest bull markets. Focusing on four major culprits--Ivan Boesky, Dennis Levine, Michael Milken, and Martin Siegel--the Pulitzer-winning reporter offers unsparing accounts of the havoc they wreaked on their own as well as in concert with wide-ranging rings of accomplices. Nor, it seems, was the performance of the SEC and US Justice Department particularly praiseworthy. Indeed, the author leaves little doubt that regulatory authorities and enforcement officials were usually overmatched and outmaneuvered. Stewart nonetheless devotes most of his attention to the villains of

the piece, who participated in and organized the era's antisocial daisy chains. Levine, for example, latched on to Boesky, who, in need of inside information to reduce the risk of his high-stakes arbitrage trading, had lured investment banker Siegel into the game. In turn, Boesky became a pawn of Milken's, a control freak whose financial acumen was exceeded only by his talent for plotting and organizing illicit buy/sell networks. The author puts paid to any lingering notion the junk-bond king was unjustly hounded by vengeful agents of the federal government. In addition, he makes clear that, but for stubborn pride and hubris, the man who leveraged corporate America could have cut a favorable deal that greatly reduced his ten-year prison sentence. A sorry and cautionary tale of world-class scofflaws, brilliantly reported by a savvy journalist with a sure sense of right and wrong. -- Copyright ©1991, Kirkus Associates, LP. All rights reserved.

Shocking and familiar

By Connor Clark Lindh

For anyone struggling to understand the motivations and ecosystem of challenges around the financial system - this is a book to read.

The details are intense and insightful. I found the profiles of the people involved most telling. Their mindsets and decisions and values say more about the challenges we face in a civil society than anything else.

The Den is still there

By Bob Carlsen

My interest in this book was prompted after I met Cary Maultasch at our dentist office. He told such interesting stories about hostile takeovers of billion dollar companies. As he was rather disheveled looking, I wasn't sure whether to believe him, so I Goggled his name when I got home. He has quite a few hits, including this book. What I found interesting after reading it was that the author's optimism that Wall Street would learn its lessons from the prosecutions. They haven't learned anything!
