A complete sham

By Benjamin Beck

I thought I would be getting something to read that would inspire me and give me some ideas on how to build a life plan (as the title indicates)... instead what I got is a Kindle "book" that is only links to articles and blogs on his website.

Only \$2.99 and I STILL want my money back. I feel ripped off.

A great and simple guide to 8 important categories of life

By Brian

A great and simple resource to help structure your life. It's flexible, give 8 categories of where you should look for continual improvement but keeps the priorities up to what works for you. I found it very helpful and a good addition to my Kindle for quick reference.

A pamphlet, not a book

By Cheesehead

There may not be an official minimum number of pages to be considered a book, but at 29 pages, this shouldn't be called a book. Also, the writer explains upfront this material is developed from Tony Robbins' Time of Your Life program. So, it's a short guide using someone else's material. Material similar to what's written in this pamphlet could likely be found in free online blogs or motivational posts.
