What are instructors are saying about MyMathLab?

"We use the MyMathLab software and are extremely pleased with the content and the technical support. We could not use this approach without it! Eighty-two percent of the students in the pilot actually admitted that it helped them learn the mathematics." from Phoebe Rouse, LSU

"The increase in student success is 27%. Students that would have been lost with a nontransferable 'D' or an 'F' are now passing the course." from a Community College in the Chicago area

"My exam averages and course pass rates our up. Students are actively engaged in practicing math, ask more and better questions, and enjoy the learning process. They appreciate the instant feedback and aren't satisfied until they get 100 percent on the homework assignments. When it comes time to register for the next class, most students who have done both lecture-based and MyMathLab hybrid classes, seek out the MyMathLab sections. They feel a real sense of accomplishment because they recognize and can take credit for the role they've played in their success." from Jill Shirley, Cal Poly Pomona

"After teaching with MML I wouldn't want to go back to the traditional way of teaching Math. MML stimulates better student/teacher interaction in a lab setting. It tracks and grades homework for you. And it's a great tutorial for students when they get stuck." from Sheila Pisa, Riverside Community College (CA)

"MML is one of the most reliable of all online Math programs." from Sheila Pisa, Riverside Community College (CA)

"I absolutely love MML. I believe whole-heartedly that it has made a definite improvement in my students' grades and understanding level. I have fewer students dropping out of the courses I am teaching using this method than in the past - before MML. I recommend it to everybody I know!!" from Susan Hutchinson, Florence Darlington Technical College

Not bad, just do your 'homework' first

By Review4u

My code worked but as with any software that require codes you need to use good judgement before you make the purchase. I paid a little more to purchase as fulfilled by Amazon. That way I could send back with ease, if there was an issue. It was a little cheaper on Amazon than my school bookstore or from MyMathLab directly.

The course itself is okay, but what are you gonna do if you need it for a class? You have to buy this no matter what. I do like how the lessons/content can be personalized and adaptive based on my personal learning needs. I was able to go in and do extra work and practice on some of the concepts that were a little hard for me to grasp. I also like that I could view my statistics to see what I excelled at or what I needed to improve upon. Unfortunately, it's a pricey product. but so are most college materials. =(Thanks for reading my review, hopefully I helped you.

Like the 1 star.... I HATE IT

By LLopez

Please do not waste your time buying this access code. I know that the price is affordable and will put more money back in your pocket. However, it is better to purchase the access code straight from the website!!! I will NEVER purchase an access code again through MyMathLab on Amazon... EVER AGAIN!! There is nothing against Amazon, it is Hall H Pearson Education. I should of trusted the reviews. When I received my access code, I immediately opened it and tried to use it for my course. I tried several times and kept getting the same error message. I made sure Hall H Pearson Education is legit, I checked the website, I checked with my instructor and the ISBN number. I even spoke with customer service and they said I needed to contact Hall H Pearson Education because it had nothing to do with the Pearson Website. After reading some reviews, I agree that of course, if you open the code it is almost impossible to get a full refund back, let alone a refund in general. I'm currently in the process of trying to get one from Amazon and I will be dropping off the code at a UPS Store. This shouldn't happen to a college student whose classes already started! Now I have to wait to see if I will get a refund, so that I may purchase an access code through the Pearson website instead... This is truly annoying and stressful.

Amazon is ripping people off with this. Don't buy this from Amazon!!

By Amazon Customer

My access code does not work. I will try to get a refund while also going directly to Pearson and possibly paying again for this... just going off feedback from other low rated complaints from people that experience this scenario as well. Class started today and since the prof just now gave the course code, there was no way to know if this access code would work before now. The description of this product did not at the time of

purchase or right now state code only covers certain courses. Guess I just need to hurry up and pay for a legit code not to fall behind in class, geez.

I usually read reviews but never guessed I would need to with what seemed to be a straightforward student course material purchase. This is a total and utter misrepresentation through Amazon. They should not sell vital school materials like this if they cannot bother verifying the integrity, validity and usability of what is being purchased, with customers' hard earned money, when searching with an exact ISBN. It is well known that college is already expensive and most students are broke. Why would you do this Amazon? Why????
