No lab software included

By Gerald

After looking at this, I wonder why I paid \$70.00 for this. For the cost, I expected to have a CD included with the lab so I could actually work the lab. No instead it expects you to already have the required software and equipment. Supposedly it tells you on the YouTube video how to download a free simulator.

With that said, the book is laid out well and should provide good practice once I go through all of the pain an additional time or cost to be able to use it.

Great deal! Great learning tool.

By Clinton R Smith

Better than I expected for the low price. I'm not even half way thru the book and have learned more than in a 16 hour 900.00 dollar course that I webt thru.
