Review

"The New Urban Crisis deserves to stand alongside Thomas Piketty's *Capital In The Twenty-First Century* as an essential diagnosis of our contemporary ills, and a clear-eyed prescription of how to cure them. It's also a rare and compelling example of a great intellect displaying the courage to re-think his older ideas in the face of changing circumstances. Anyone interested in the crisis of inequality and in the vitality of our cities will want to read this book."

-Steven Johnson, author of *How We Got To Now* and *Where Good Ideas Come From*

"Richard Florida offers a brilliant assessment of the varied and evolving challenges facing our cities today. At a time when cities are more important than ever to our economic and political future, *The New Urban Crisis* is essential reading for urban leaders and all city-dwellers."

-Richard M. Daley, former mayor of Chicago

"Richard Florida demonstrates again that he is one of the most discerning (and provocative) observers of the great metropolitan migrations of the past 60 years. Using masses of carefully curated demographic data, he identifies the winners and losers of the widespread 'urban resurgence' of the past couple of decades. His observations are disquieting on many levels, and Florida doesn't shy away from proposing bold and sometimes costly solutions. *The New Urban Crisis* is certain to be one of the most widely debated books of the year."

-Governor John Hickenlooper, Colorado

"Cities are engines for prosperity and progress, but it's essential that the benefits extend far and wide. Florida

proposes promising ideas for building stronger cities that offer greater opportunities for all."

-Michael Bloomberg, former mayor of New York City

"Richard Florida is the great pioneer thinker who first explained how the influx of creative people was reviving cities. Now he takes the next step: looking for ways to make this urbanism more inclusive. Florida takes a hard look at the problems and, as usual, comes up with some smart new policies. Making cities work for all residents is one of the great economic, political, and moral issues of our time."

-Walter Isaacson

"This is the book we have been waiting for. Richard Florida is the greatest American urbanist of our time. In this book, he thoughtfully and forcefully confronts how Americans' return to our cities has brought incredible cultural and economic renewal but without careful and thoughtful land use, infrastructure, and economic justice initiatives, this renewal is leaving a disappearing middle class in its wake. This is an indispensable read for policy makers, students, educators, and all urban dwellers alike. Florida sketches an urgent roadmap to ensure that America's urban revival brings prosperity to everyone, not just a few."

-Mayor Eric Garcetti, Los Angeles

"A sweeping narrative of the most significant human movement of our times: global urbanization. Richard Florida lays out with unassailable facts and clear vision the convergence of an urgent human development—the drive for more livable cities and the quest for a more sustainable planet. Clear, compelling, and full of vision."

-Martin O'Malley, former governor of Maryland

"Perceptions of urban crisis are steeped in the past, dominated by images of deindustrialization, economic decline, high crime, the hollowing out of cities, and rampant suburbanization. Urban divergence is the reality today—superstar cities like New York are thriving like never before while other cities continue to languish. Suburban communities are also tackling problems once thought unique to cities, and as the recent presidential election revealed, the divide between urban and rural has deepened. The urbanist Richard Florida, famous for his work on the creative class, turns his attention in *The New Urban Crisis* to the paradox of our times—the "clustering force" of concentrated talent and economic activity is simultaneously an engine for urban growth and a driver of inequality. Not everyone will agree, but the general public, leaders, and students of cities will profit by engaging his provocative data and ideas. Don't be fooled by the title—crisis is double-edged and at the end, Florida lays out an ambitious but concrete plan for a renewed and more equitable urbanism. Rather than provoking angst, *The New Urban Crisis* is an inspired and pointed call to action."

-Robert J. Sampson, Harvard University and author of *Great American City: Chicago and the Enduring Neighborhood Effect*

"Our ability to innovate and grow our economy and job base will be a result of our ability to educate and cluster talent and reimagine our infrastructure, while having a diverse work force with access to transit systems and housing to support that growth. In his new book, Richard Florida does an incredible job in not only laying out these issues facing the great urbanization of America with compelling data, but in offering thoughtful solutions to the challenges and opportunities."

-Jodie W. McLean, Chief Executive Officer, EDENS

THE NEW URBAN CRISIS: HOW OUR CITIES ARE INCREASING INEQUALITY, DEEPENING SEGREGATION, AND FAILING THE MIDDLE CLASS—AND WHAT WE CAN DO PDF

In recent years, the young, educated, and affluent have surged back into cities, reversing decades of suburban flight and urban decline. And yet all is not well, Richard Florida argues in *The New Urban Crisis*. Florida, one of the first scholars to anticipate this back-to-the-city movement in his groundbreaking *The Rise of the Creative Class*, demonstrates how the same forces that power the growth of the world's superstar cities also generate their vexing challenges: gentrification, unaffordability, segregation, and inequality. Meanwhile, many more cities still stagnate, and middle-class neighborhoods everywhere are disappearing. Our winner-take-all cities are just one manifestation of a profound crisis in today's urbanized knowledge economy.

A bracingly original work of research and analysis, *The New Urban Crisis* offers a compelling diagnosis of our economic ills and a bold prescription for more inclusive cities capable of ensuring growth and prosperity for all.
