a coffee table book

By A. Sun

more like a coffee table book than an info book, just wished had introduced more plants.

Buy this if you are completely new to indoor plants and saw beautiful trendy interiors on Instagram, this books talks about the most trendy plants right now.

Buy this if intend to use it as a display or showing guests your tastes, the photos of plants and homes are beautiful.

Don't get me wrong, I bought two of these and gave one as a gift because the book is indeed artistically made and to support the author, but

save the money if you already own more than one indoor plant and try to broaden your indoor plant knowledge.

If you want to style your home with indoor plants, try Instagram or Pinterest.
